

Balance of Plant

The Balance of Plant (BoP) is the most important link for delivering power produced by your sustainable energy assets to the marketplace. Invenergy provides the tools and experience you need to ensure your investments remain connected to the market.

We know sustainable energy. Make our expertise your advantage.

What Sets Us Apart

In-House Capabilities

Majority of BoP activities are self-performed by qualified in-house technicians to ensure high reliability and lower contractor cost.

Engineering Support

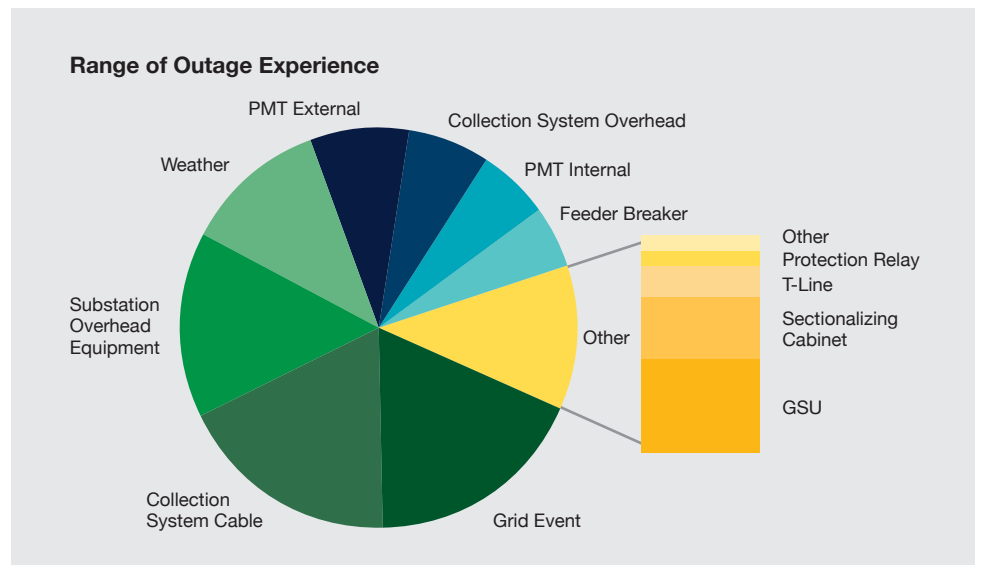

Professional staff with 15+ years of experience gained across 40 operating projects.

Independent Perspective

On-site oversight of OEM provides confidence and peace of mind that your interests always come first.

Stay Connected with Confidence

With an experienced team of electrical engineers monitoring our facilities 24/7, Invenergy is able to respond quickly to a wide range of forced outage events and ensure timely capture of evidence. We can also provide targeted solutions to minimize return-to-service time and maximize opportunity.

What We Offer

Civil

- Road and drainage maintenance (including snow removal)
- Vegetation management
- Wildlife control
- Foundations
- Meteorological towers
- Communications and SCADA networks
- O&M building

Electrical

- 24/7 remote monitoring to support operational directives
- Scheduled and unscheduled maintenance of electrical systems, including:
 - » Pad-mounted transformers
 - » Collection system
 - » Switch gear
 - » VAR banks
- Medium and high voltage switching and procedure development (pad mount and substation)
- Coordination of overhead/underground HV transmission line maintenance

Owners Representative Support

- Contractor management
- Landowner support
- Environmental compliance
- NERC/GADS compliance reporting

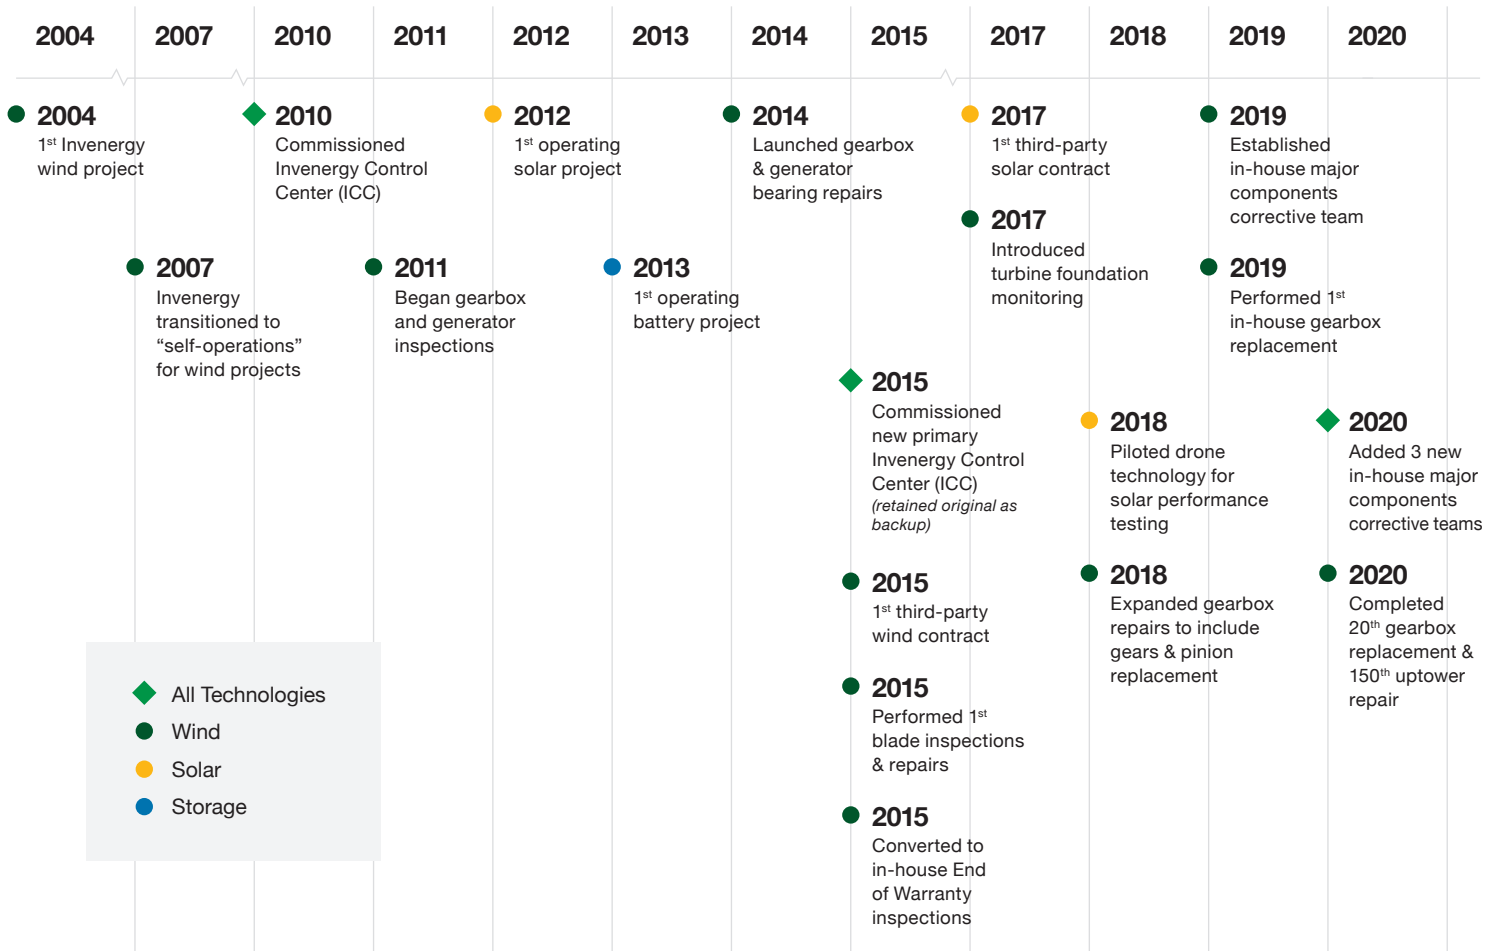

Invenergy Services

Operate with excellence.

Invenergy Services provides sustainable energy asset owners end-to-end solutions for every aspect of asset management, operations and performance analysis. Invenergy Services currently manages more than 10,000 megawatts of wind, solar, natural gas and battery storage facilities, including 1,500 megawatts owned by third-parties. With on-site technicians, a state-of-the-art 24/7 Invenergy Control Center, and a progressive safety culture, Invenergy Services helps customers operate with excellence.

Invenergy Services Timeline

About Invenergy

We move projects from the drawing board to reality.

Invenergy is a leading privately held global developer and operator of sustainable energy solutions. Powered by decades of entrepreneurial experience and unparalleled execution, we solve the energy challenges facing our customers and our communities. We are innovators building a sustainable world.
